Personality & Competences

I'm experienced and passionate Web developer & designer with wide skill-set in IT & Communication field, additionally with strong Landscape architecture qualification.

I have Top-up Bachelor's degree in Web development.

I'm opened for learning unknown technologies or level up existing skill-set. I have work experience from IT companies and freelance projects.

I have developed landing-pages, websites & portfolio's, booking systems & security forms and have designed mockups, prototypes, templates etc. Capable of hendling project's managment cycle independently.

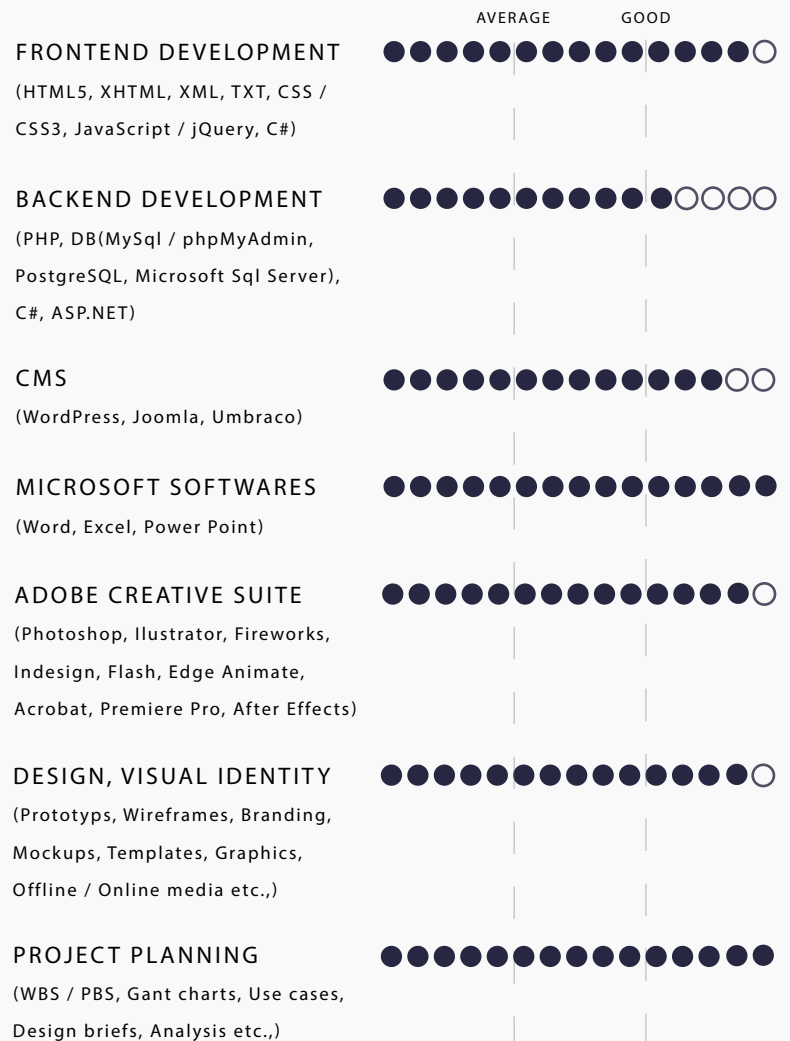

My goals are associated with development area, such as frontend/backend and testing.

I'm known as a flexible, active, responsible, reliable colleague with sense of humour. Comfortable working independently and in team.

My work motivation is - everything has a solution and nothing is impossible. And most I value happy users & customers.
